SUMMARY

Systems software engineer with 15 years of experience in C/C++ development across Linux, embedded, RTOS, and Windows platforms. Expertise in Linux systems programming, multithreading, concurrency, IPC, memory management, debugging, and performance optimization. Hands-on experience in GPU/graphics driver development across Mesa, LLVM, libdrm, and Linux DRM/KMS, along with embedded and hardware-adjacent software development. Experienced technical lead with end-to-end ownership from design through production support.

EDUCATION

Uttar Pradesh Technical University (UPTU)

B.Tech

2010

Pune University

Diploma in System Software

2011

EXPERIENCE

Software Engineer 4 — Resource Manager

Dec 2024 – Present

COHESITY INC.

Pune

- Design and implement cloud-native resource-management components using C++, Go, and Python.
- Develop services provisioning and tracking Linux/Windows VMs, disks, and containerized workloads using gRPC/REST.
- Own features end-to-end, including architecture, implementation, testing, and root-cause analysis of production issues.

Principal Software Engineer

Jan 2023 – Dec 2024

VERITAS TECHNOLOGIES

Pune

- Developed C++ licensing and entitlement functionality for a shared license-validation component.
- Developed and validated software across Windows, Red Hat, OpenSUSE, AIX, and Solaris.
- Managed OpenSSL/POCO builds, CVE remediation, SDK delivery, and SBOM generation.

Senior Software Engineer / Technical Lead

Mar 2019 – Jan 2023

SIEMENS MOBILITY

Pune

- Led six engineers developing safety-critical C/C++ software for railway control systems.
- Owned requirements, design, implementation, code reviews, testing, release, and technical mentoring.
- Developed Python automation for environment setup and unit-test baseline management.

Specialist — Automotive Embedded Systems

Jun 2015 – Mar 2019

TATA ELXSI

Pune

- Developed C/C++ connectivity software for automotive infotainment systems on QNX and Windows.
- Worked on voice commands, touch/UI input, CAN integration, debugging, and root-cause analysis.

Senior Software Engineer — Graphics Driver Development

Aug 2014 – Jun 2015

INFOSYS

Pune

- Developed across the AMD Radeon Linux graphics stack using OpenGL, Mesa, LLVM, libdrm, and DRM/KMS.
- Debugged GPU command submission and rendering pipelines; developed OpenGL validation applications.

Software Engineer

Aug 2011 – Aug 2014

- Developed C/C++ avionics software on LynxOS.
- Worked with interrupts, MMIO, hardware registers, synchronization, buffer queues, and Trace32 debugging.

TECHNICAL SKILLS

Languages: C, C++ (11/14/17, STL, Templates, RAII, Move Semantics), Python, Go

Systems: Linux, POSIX, IPC, TCP/IP, Multithreading, Synchronization, Memory Management

GPU/Graphics: OpenGL, Mesa, LLVM Graphics Pipeline, libdrm, Linux DRM/KMS, Command Submission

Embedded: Embedded Linux, QNX, LynxOS, WinCE, ARM, x86, Device Drivers

Tools: GDB, Trace32/Lauterbach, GoogleTest/GoogleMock, CMake, Bazel, Jenkins, Git
